

Saturday 8 May: Registration

15:00-19:00: Registration, possibility to visit the museum, and (until 19:00):
Icebreaker party at the museum café

Sunday 9 May: Field trip

9:00: Museum open
9:30: Departure from museum
10:00-12:30: Visit to type section of the Maastrichtian Stage at the ENCI-Maastricht quarry
13:00-15:00: Lunch in Geulhem
15:00: Visit to Geulhemmerberg KT-section
16:30: Back to Maastricht
17:00: Arrival at museum

Monday 10 May: Sessions

9:00: Museum open
9:30: Welcome by Douwe Th. de Graaf, director of the Natuurhistorisch Museum Maastricht
9:40: Technical announcements

9:45: **First session.** Session moderator: Eric W.A. Mulder

9:45: Polyphyly of Mosasauridae: the growing body of evidence
Gorden L. Bell, Jr. & Michael J. Polcyn

10:05: A new late Middle Turonian Mosasauroid from Texas
Michael J. Polcyn & Gorden L. Bell, Jr.

10:20: New data from *Opetiosaurus buccichi* and an examination of Aigialosaur systematics
Alex Dutchak

10:35-11:00: Coffee break

11:00: **Second session.** Session moderator: John W.M. Jagt

11:00: On the squamate relationships of Mosasauroids and Dolichosaurs: are they really varanoids?
Michael W. Caldwell

11:15: Age, environment, and habitat of Dolichosaurs and primitive Mosasauroids

Louis L. Jacobs, Michael J. Polcyn, Kurt Ferguson, Christine Rennison & Louis H. Taylor

11:30: Tooth morphology and species determination in North American *Mosasaurus*
Takehito Ikejiri

11:45: A new look at the morphology and distribution of *Mosasaurus conodon* in North America
Takehito Ikejiri & Spencer G. Lucas

12:00-13:30: Lunch break

13:30: **Third session.** Session moderator: Anne S. Schulp

13:30: Recent Campanian and Maastrichtian Mosasaur discoveries from New Jersey and Delaware, USA:
implications for mosasaur extinction
William B. Gallagher

13:50: An intercontinental mosasaur extinction event at the Early / Late Campanian boundary
Johan Lindgren

14:10: Additional records of *Clidastes* Cope 1868 in the Upper Campanian from NW Germany
Michael W. Caldwell & Cajus Diedrich

14:30: Discussion: possibilities for a mosasaur book with Indiana University Press

15:00-15:30: Coffee break

15:30: **Poster session and opportunity to exchange offprints**

- Mosasaurids from the Maastrichtian Phosphates of Morocco
Nathalie Bardet, Xabier Pereda Suberbiola, Mohamed Iarochene, Baadi Bouya & Mbarek Amaghazaz
- Preliminary catalogue of marine squamates (Reptilia) from the Upper Cretaceous of Northeastern Mexico
Marie-Céline Buchy, Krister T. Smith, Eberhard Frey, Wolfgang Stinnesbeck, Arturo H. González González, Christina Ifrim, José Guadalupe López-Oliva & Hector Porras-Muzquiz
- A review of Australian mosasaur occurrences and their related vertebrate assemblages
Benjamin P. Kear, John A. Long & James E. Martin
- New record of the mosasaur *Prognathodon* from the Upper Cretaceous of Colorado and the distribution of the genus in North America
Spencer G. Lucas & Takehito Ikejiri
- Mosasaur fossils from the Upper Cretaceous Izumi Group of Southwest Japan
Masahiro Tanimoto
- Maastrichtian mosasaurid reptiles from North and Central Bulgaria
Plamen Tzankov Ivanov

17:00: Museum closes

19:30-22:30: Evening session, at the museum. Meeting with local amateur collectors
Drinks will be offered by the museum

Tuesday 11 May: Sessions

9:00: Museum open

9:30: Technical announcements

9:40: **First session.** Session moderator: Michael W. Caldwell

9:40: Revisions to the anatomy and systematics of North American tylosaurine mosasaurs
Timon Bullard

10:00: *Tylosaurus* novum sp.: an update on an unnamed species of basal tylosaurine
Michael J. Everhart

10:25: The tylosaurine *Hainosaurus* in the Campanian and Maastrichtian of Central Poland?
John W.M. Jagt, Johan Lindgren, Marcin Machalski & Andrzej Radwanski

10:40-11:10: Coffee break

11:10: **Second session.** Session moderator: William B. Gallagher

11:10: A gravid mosasaur (*Plioplatecarpus*) from South Dakota
Gorden L. Bell, Jr. & Amy M. Sheldon

11:25: Feeding the Mechanical Mosasaur: what did *Carinodens* eat?
Anne S. Schulp

11:45: 'Tyrannosaurus' of the sea: the huge mosasaur, *Prognathodon*, from Israel, a preliminary functional analysis
Per Christiansen & Niels Bonde

12:10: A forked mosasaur tongue: fact or fiction?
Anne S. Schulp & Eric W.A. Mulder

12:20-13:50: Lunch break

13:50: **Third session.** Session moderator: Michael J. Everhart

13:50: Is *Mosasaurus lemonnieri* a juvenile *Mosasaurus hoffmanni*? A discussion
Eric W.A. Mulder, Dirk Cornelissen & Louis Verding

14:10: Refining global mosasaur biostratigraphy
Marcus R. Ross

14:30: The biostratigraphy of mosasaurs in the extended type area of the Maastrichtian Stage
John W.M. Jagt

14:50-15:20: Coffee break

15:20: **Fourth session.** Session moderator:

15:20: Kiwi's and trappists: a New Zealand mosasaur in Belgium and France
Michael W. Caldwell, Gordon L. Bell, Jr. & Robert Holmes

15:40: The utility of isolated teeth in mosasaur taxonomy
Johan Lindgren

16:00: The discovery, excavation, preparation and presentation of *Prognathodon saturator* ('Bèr')
(video)
Rudi W. Dortangs

17:00: Museum closes

18:30: Conference dinner at Petit Bonheur
Achter de Molens 2, Maastricht. Phone: 043 3215109

Wednesday 12 May: Excursion to Teylers Museum

9:00: Rendezvous at Maastricht central station, in main hall

9:29: Departure of express train to Haarlem; arrival 12:21

12:40 Arrival at Teylers museum (short walk); lunch

13:30 Welcome (at the auditorium)

14:00 Guided tour (in two groups)

15:00 Coffee, opportunity to visit museum

16:11 / 16:41 / 17:11: Departures of trains to Maastricht
